

Junos Layer 3 VPNs (JL3V)

Engineering Simplicity

COURSE LEVEL

Junos Layer 3 VPNs (JL3V) is an advanced-level course

AUDIENCE

This course benefits individuals responsible for configuring and monitoring devices running the Junos OS.

PREREQUISITES

Students should have intermediate-level networking knowledge and an understanding of OSPF, ISIS, BGP, and Junos policy. Students should have experience configuring MPLS label-switched paths using Junos. Students should also attend the Introduction to the Junos Operating System (IJOS), Junos Intermediate Routing (JIR), and Junos MPLS Fundamentals (JMF) courses prior to attending this class.

COURSE OVERVIEW

This three-day course is designed to provide students with MPLS-based Layer 3 virtual private network (VPN) knowledge and configuration examples. The course includes an overview of MPLS Layer 3 VPN concepts, scaling Layer 3 VPNs, Internet access, Interprovider Layer 3 VPNs, and Multicast for Layer 3 VPNs. This course also covers Junos operating system-specific implementations of Layer 3 VPNs. These concepts are put into practice with a series of in-depth hands-on labs, which will allow participants to gain experience in configuring and monitoring Layer 3 VPNs on Junos OS devices. These hands-on labs utilize Juniper Networks vMX Series devices using the Junos OS Release 16.1R3.10, but are also applicable to other MX Series devices.

OBJECTIVES

- Describe the value of MPLS VPNs.
- Describe the differences between provider-provisioned VPNs and customer-provisioned VPNs.
- Describe the differences between Layer 2 VPNs and Layer 3 VPNs.
- List the provider-provisioned MPLS VPN features supported by the Junos OS software.
- Describe the roles of a CE device, PE router, and P router in a BGP Layer 3 VPN.
- Describe the format of the BGP routing information, including VPN-IPv4 addresses and route distinguishers.
- Describe the propagation of VPN routing information within an AS.
- List the BGP design constraints to enable Layer 3 VPNs within a provider network.
- Explain the operation of the Layer 3 VPN data plane within a provider network.
- Create a routing instance, assign interfaces to a routing instance, create routes in a routing instance, and import/export routes from a routing instance using route distinguishers/route targets.
- Describe the purpose of BGP extended communities, configure extended BGP extended communities, and use BGP extended communities.
- List the steps necessary for proper operation of a PE-CE dynamic routing protocol.
- List the troubleshooting and monitoring techniques for routing instances.
- Explain the difference between the bgp.l3vpn table and the inet.0 table of a routing instance.
- Monitor the operation of a CE-PE dynamic routing protocol.
- Explain the operation of a PE multi-access interface in a Layer 3 VPN and list commands to modify that behavior.
- Describe ways to support communication between sites attached to a common PE router.
- Provision and troubleshoot hub-and-spoke Layer 3 VPNs.
- Describe the flow of control traffic and data traffic in a hub-and-spoke Layer 3 VPN.
- Describe QoS mechanisms available in L3VPNs.
- Configure L3VPN over GRE tunnels.
- Describe the RFC 4364 VPN options.
- Describe the carrier-of-carriers model.
- Configure the carrier-of-carriers and "Option C" configuration.
- Describe the flow of control and data traffic in a draft-rosen multicast VPN.
- Describe the configuration steps for establishing a draft-rosen multicast VPN.
- Monitor and verify the operation of draft-rosen multicast VPNs.
- Describe the flow of control traffic and data traffic in a next-generation multicast VPN.
- Describe the configuration steps for establishing a next-generation multicast VPN.
- Monitor and verify the operation of next-generation multicast VPNs.
- Describe the flow of control traffic and data traffic when using MPVPNs for Internet multicast.
- Describe the configuration steps for enabling internet multicast using MVPNs.
- Monitor and verify the operation of MVPN internet multicast.

COURSE CONTENT

Day 1

1	COURSE INTRODUCTION	4	Basic Layer 3 VPN Configuration <ul style="list-style-type: none"> Preliminary Steps PE Router Configuration LAB: Layer 3 VPN with Static and BGP Routing
2	MPLS VPNs <ul style="list-style-type: none"> MPLS VPNs\ Provider-Provisioned VPNs 	5	Layer 3 VPN Scaling and Internet Access <ul style="list-style-type: none"> Scaling Layer 3 VPNs Public Internet Access Options LAB: LDP over RSVP Tunnels and Public Internet Access
3	Layer 3 VPNs <ul style="list-style-type: none"> Layer 3 VPN Terminology VPN-IPv4 Address Structure Operational Characteristics 		

Day 2

6	Layer 3 VPNs – Advanced Topics <ul style="list-style-type: none"> Exchanging Routes between Routing Instances Hub-and-Spoke Topologies Layer 3 VPN CoS Options Layer 3 VPN and GRE Tunneling Integration Layer 3 VPN and IPsec Integration Layer 3 VPN Egress Protection BGP Prefix-Independent Convergence (PIC) Edge for MPLS VPNs VRF Localization Provider Edge Link Protection Support for Configuring More Than 3 Million L3VPN Labels LAB: GRE Tunneling and Route Redistribution	7	Interprovider Backbones for Layer 3 VPNs <ul style="list-style-type: none"> Hierarchical VPN Models Carrier-of-Carriers Model Option C Configuration LAB: Carrier-of-Carriers VPNs
		8	Troubleshooting Layer 3 VPNs <ul style="list-style-type: none"> Working with Multiple Layers Troubleshooting Commands on a PE Device Multi-Access Interfaces in Layer 3 VPNs PE and CE-Based Traceroutes Layer 3 VPN Monitoring Commands LAB: Troubleshooting Layer 3 VPNs

Day 3

9	Draft Rosen Multicast VPNs <ul style="list-style-type: none"> Multicast Overview Draft Rosen MVPN Overview Draft Rosen MVPN Operation Configuration Monitoring 	10	Next-Generation Multicast VPNs <ul style="list-style-type: none"> Multicast VPN Overview Next-Generation MVPN Operation Configuration Monitoring Internet Multicast Ingress Replication Internet Multicast Signaling and Data Plane Configuring MVPN Internet Multicast Monitoring MVPN Internet Multicast' LAB: MVPNs
